

INTEGRAL SEAL'S NEW ETCH INK

Integral Seal is thrilled to introduce a new **Etch Ink** digital printed product. Just like our regular color inks, this new Etch Ink can print any design or pattern you need. The main difference with Etch Ink as appose to the regular colors is its transparency. This makes it ideal for units, railings, and other applications where a more subtle appearance is desired.

NEW - ETCH INK

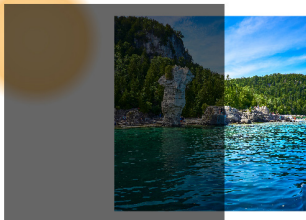

REGULAR - WHITE INK

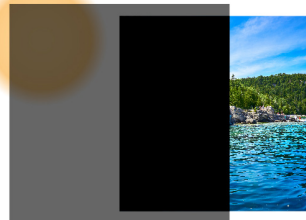

DEFINING THE DIFFERENCE

The purpose of these diagrams is to help determine the most suitable ink for your specific application. They outline the distinctions between the regular translucent inks and the new transparent Etch Ink.

New Etch Ink *Transparent*

Allows light & vision through.

Regular White Ink *Translucent*

Allows light but no vision through.
